Professional Summary

Java Backend Developer with hands-on experience developing RESTful APIs and full-stack backend systems using Java, Spring Boot, Spring Security, PostgreSQL, Docker, and Keycloak. Built production-style projects including a microservices e-commerce platform, a social book exchange platform, and a real-time messaging application with WebSockets. Currently seeking a Junior Backend Developer position where I can contribute while continuing to grow.

Professional Experience

Backend Developer Intern – Connect Digital Solutions

Aug 2023 – Oct 2023

- Developed RESTful APIs using Java and Spring Boot following REST best practices.
- Built backend modules with Spring MVC, Spring Data JPA, and Hibernate.
- Participated in debugging, testing, and improving backend services.

Projects

Easy Buy – Microservices E-Commerce Platform – (github.com/bedo-morad/Easy-Buy)

Spring Boot, Keycloak, Kafka, Eureka, Docker, PostgreSQL, MongoDB, Flyway, OpenFeign, Zipkin.

- Designed and implemented an e-commerce platform using Microservices Architectur.
- Implemented authentication and authorization using Keycloak.
- Built independent backend services communicating through OpenFeign and Apache Kafka.
- Containerized the entire system using Docker Compose.

BookVerse – Social Book Exchange Platform – (github.com/bedo-morad/BookVerse)

Spring Boot, Spring Security, JWT, JPA, PostgreSQL, Angular, Docker, Swagger.

- Developed secure REST APIs using Spring Boot.
- Implemented authentication using Spring Security and JWT.
- Integrated Angular frontend with backend REST services.

SwiftChat – Real-Time Messaging Application – (github.com/bedo-morad/SwiftChat)

Spring Boot, Spring Security, Keycloak, PostgreSQL, WebSockets, SockJS, STOMP, Angular, Docker, OpenAPI

- Developed an authenticated one-to-one messaging application using Spring Boot, Keycloak, PostgreSQL, and Angular.
- Implemented JWT-based authentication, user synchronization.
- Added multipart image upload and OpenAPI documentation with generated Angular services.

Masa2o Ta7ady – Football Quiz Challenges – (https://github.com/bedo-morad/Masa2o-Ta7ady)

Get your friends together, split into two teams, and find out who actually remembers all that football trivia.

Spring Boot, Angular, PostgreSQL, Flyway, Docker, GitHub Actions

- Developed REST APIs backed by PostgreSQL and managed schema changes with Flyway.
- Added question management with admin-gated editing, JSON bulk imports, and dry-run validation.
- Built configurable timers, scoring, team settings, responsive layouts, and light/dark themes.

Education

MTI University - 2020–2024

Bachelor of Computer science & Artificial Intelligence

Technical Skills

Java, Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, Maven, Validation, REST APIs, Microservices, JWT, Lombok, Spring Data JPA, Keycloak, PostgreSQL, SQL Server, MongoDB, Docker, Docker Compose, Kafka, Eureka, Spring Cloud Gateway, OpenFeign, Zipkin, Flyway, Git, GitHub, Swagger/OpenAPI, Angular, Bootstrap.
